HYPACK 2019 Training Event Recap

By Christine Roca

The HYPACK 2019 User Training Event was held from January 8th-10th in Corpus Christi, TX. This is the 26th anniversary of this seminar and we are constantly evolving to make it an impactful event. This year we successfully introduced our first Q&A session. Our panel of experts answered both pre-selected and random audience questions. This was just another opportunity for attendees to have direct access to the HYPACK Team to further their knowledge of HYPACK®. Everyone was so thrilled with the outcome that it will be a permanent fixture at our future HYPACK Events. We also revamped the content of our presentations, concentrating more on utilization within the workflow. This allowed us to focus on situational usage of HYPACK® in day-to-day applications.

We also revealed our newest version, HYPACK® 2019. Attendees were the first to receive training on these new features. Some of these features included: HYPACK® Instant Profile, Multispectral Bathymetric Processing and new side scan features.

This annual seminar is beneficial to all who attend. We offer general training sessions for those who are just beginning to use HYPACK®, and sessions for people who need a refresher. Expert sessions are available for a more in-depth training on a particular subject. Also offered throughout the event are one-on-one sessions with our technicians and programmers to assist you with specific questions. Anyone attending will have the opportunity to receive comprehensive instruction in HYPACK®, DREDGEPACK® and HYSWEEP® software.

Not only does the HYPACK Training Event offer a forum for attendees to receive essential instruction in HYPACK® hydrographic and dredging applications; it provides an opportunity for them to network with others and view exhibits from industry leaders: hardware vendors, equipment resellers, and service providers.

As in past years, all presentations will be posted on Ustream.tv and on our website at www.hypack.com.

We would like to extend a special Thank You to all the attendees and exhibitors who came to Corpus Christi and made HYPACK 2019 a memorable and exciting event! We enjoy all the positive feedback and can't wait for HYPACK 2020!
