Sounding Better!

Training Opportunities and Other Activities in the Latin American Region During 2019

By Carlos Tejada

2019 just started and we want to inform you about the training opportunities that we are going to have in the Latin American region, so you can make preparations to participate. In each case, we will provide you with our reseller contact information to facilitate the process.

TRAINING SEMINARS

HYPACK SEMINARS

As usual, we will have 4 HYPACK® Seminars in the region. As you may all know, those are 3-day events in which we show you the main features of the HYPACK® package through Powerpoint presentations and program demonstrations. There is no need to bring your own computer. This is a great way to learn the latest features in the program, and get very inexpensive training for new users.

In 2019, we will have the following seminars. In each case, I have indicated the reseller, who is the local organizer, and the person handling all the registrations.

Conducted In Spanish:

Seminar	Organizer	Contact
May 8 – 10 Cartagena, Colombia	DISSMAN	Joan Sebastian Pulido taller@dissmaningenieria.com
June 5 – 7 Ciudad de Panamá, Panamá	GEOSYSTEM	Ahidee Tabares ahidee@geosysteming.com
July 3 - 5 Valparaiso, Chile	BENTOS	Eleonora Barroso eleonora@bentos.cl

Conducted in English:

Seminar	Organizer	Contact
Date Pending Rio de Janeiro, Brazil	A2 MARINE	Erica Biar erica@a2marinesolution.com

As usual, we provide more details about these seminars on our web page (www.hypack.com).

MULTIBEAM CLASS

This is an open class available to anyone interested in Multibeam Surveys. We will conduct this training on April 1 – 5 in Bahia Blanca, Buenos Aires, Argentina. The Bahia Blanca Port will provide a survey boat equipped with an R2Sonic system, so the class will include theoretical presentations, class exercises, and real-time, onboard demonstrations.

If you want to participate, please contact our reseller in Argentina, INGENIEROS ELECTRONICOS ASOCIADOS. Ing. Wendell S. Jones wjones@ieasrl.com.ar will gladly provide you with the required information. Please contact him soon, as we do not have many places available for this class.

NOTE: This will be the only Multibeam course in Spanish that we provide in 2019.

DREDGEPACK & VOLUMES CLASS

This will be the first course of this type provided in Spanish. It is a 3-day training in navigational channel design in HYPACK®, volume computations and DREDGEPACK®, which is our software for dredge operators. If you will be working on a dredge or if you have a dredging project calculating volumes, this is the training for you.

It will be conducted in August 14 to 16th. Registrations must be made through DISSMAN, our reseller for Colombia. Please contact Joan Sebastian Pulido taller@dissmaningenieria.com.

SUB-BOTTOM & SIDE SCAN CLASS

This course is organized by A2 Marine, our distributor for Brazil. It will take place right after the HYPACK® seminar but will require an independent registration. Be sure you specify the activity in which you want to participate.

This training will include practical sessions onboard a vessel equipped with Klein instruments. If you are interested, please contact Erica Biar erica@a2marinesolution.com at A2 Marine for more information.

HYDROGRAPHIC COMMISSIONS

In addition to our training events, HYPACK will attend the South West Atlantic Hydrographic Commission to be held in Buenos Aires from April 10th to 12th; and the Meso American &

Caribbean Regional Hydrographic Commission in Santo Domingo, Dominican Republic in November 2019.

If you know of other meetings where HYPACK participation would be important, please let us know so we can make arrangements. If you want to participate in one of our events, please contact the resellers indicated or send me a message at carlos@hypack.com.

Please remember that we normally have limited seats available, so contact us as soon as possible to reserve your place.
