Sounding Better!

## News from Europe, the Middle East and Africa

November 2018

By Boris Schulze

### ***HYPACK TRAINING IN POLAND***

A year goes by fast. It is already October and the seminar season has started. We went to Poland and did a three-day seminar at the Politechnica University in Gdansk. As always, the seminar was completely full. This year, 49 attendees listened to lectures in the morning, and did practical exercises in the afternoon.

The next seminar will be in Odessa, Ukraine from 14.-15. November. *This seminar will be free of charge and in Russian!* To sign up, visit our website or send an inquiry to [training@hypack.com](mailto:training@hypack.com).

### ***NEW RESELLER IN THE KINGDOM OF SAUDI ARABIA***

We have recently appointed “The Quality Geospatial Engineering Company (QGC)” as a reseller in the Kingdom of Saudi Arabia. Since 2014 QGC has provided advanced Geospatial Solutions and Applications and specializes in many areas:

- Geospatial Consultancy Services, Roadmaps and Strategies

- 
- Surveying & Data Acquisition Services: aerial surveying, UAV (drone), hydrographic survey, utilities survey, mobile mapping
  - Geospatial application design and integration, geoportals
  - Geospatial Intelligence Solutions
  - Geospatial Data & Information Solutions include geodatabase, virtual reality, 3D & 4D monitoring
  - Geospatial training and competency programs

QGC has successfully implemented and completed many projects in KSA.

If you would like to renew your HYPACK® software maintenance plan or require any further HYPACK® software licenses for your projects, contact:

Mohammed Jweied

Business Development Manager

The Quality Geospatial Engineering Company (QGC)
