## HYPACK 2020 User Training Event: Jacksonville, FL

by Christine Roca

We are happy to announce that the HYPACK® 2020 User Training Event will be held in Jacksonville, FL from January 6th- 9th at The HYATT Regency Jacksonville.

During this event, we will reveal the newest version of our software, version HYPACK® 2020. Attendees will get first-hand knowledge and training on all the new updates and improvements this version has to offer.

The HYPACK® User Training Event is an essential, low-cost method to receive comprehensive instruction in HYPACK®, DREDGEPACK®, and HYSWEEP® software. This training is beneficial to all as we provide a general training session for beginning users of HYPACK® or those who wish to have a refresher. There are also breakout sessions for users who need more in-depth training on a particular subject.

If you need help with an individual issue or question, one-on-one sessions with our technicians and programmers are available throughout the event. Please continue to check our website as updates and registration information will be added at a later date. We look forward to seeing you in Jacksonville!

The HYPACK Team
