Sounding Better!

## Quarterly Updates

By Joseph Adamski

Traditionally, HYPACK makes a wide variety of features throughout the year and hides them away until it is time to make a new, yearly HYPACK® release. The group here at HYPACK has decided that we would like to get these new features to customers a bit early rather than letting them gather dust.

Each quarter, HYPACK will post a downloadable ZIP file of programs for you to place in the latest HYPACK® installation so you can use the slew of new options. Additionally, a simultaneous *Sounding Better!* newsletter will describe the work that has been done for that particular update.

The goal with quarterly updates is to provide our customers with valuable features as soon as possible. Additionally, it may be less overwhelming for you when the annual release comes as you will have been able to try out some of the new features from the quarterly updates. Of course, HYPACK will still release critical updates outside of these quarterly updates in order to ensure timely posting of important fixes.

After trying some of these new features, feel free to send us some feedback! We are always interested in hearing what HYPACK® users are thinking.
