Training Conferences and Seminars in Latino America during 2020

By Carls Tejada

Greetings to all our users and best wishes for this 2020 that is just beginning.

On this occasion, I want to share with you the Training Conferences and Seminars in which we will participate or that we will carry out in the Latin American area during this year.

As usual, HYPACK seminars and trainings will be conducted in coordination with our agents in the region. In each country, they will be in charge of registration, defining the venue and coordinating all logistical support. including helping the participants with their arrangements for the seminar or training event.

HYPACK SEMINARS

As you may remember, these are 3-day training events, where we try to intensively cover most of the program features. Here we seek the maximum participation (as many users as possible) and therefore, the registration cost is reduced to a minimum. Basically, these are presentations and demonstrations with the software made by the instructor. Given the number of participants, they are not required to bring a computer into the seminar, since there is no possibility of practical sessions. The seminar is ideal for a general training of new users, as a refresher for old users and to find out about the new features in the program for expert users. We hope to have something for everyone. There is also an opportunity to present your suggestions and to have a one-on-one consultation with the Instructor. This year, we will have seminars in the following places:

Date	Language	City	Country	Local Reseller
April 21 to 23th	Spanish	Veracruz	México	SEAPROD – Lic. Víctor Andoni Aguirre Hernández vaah@seaproduct.com.mx
May 12 to 14	Spanish	Lima	Perú	BIDHUMVA – Humberto Vasquez visiontecnology@yahoo.es
June 23 to 25	English	Port of Spain	Trinidad & Tobago	Gibraltar Solutions Dave Stoute gibraltar.solutions@hotmail.com
August 25 to 27	Spanish	Ciudad de Guatemala	Guatemala	NETCORE Marlon Essban Torres essbantorres@gmail.com

Date	Language	City	Country	Local Reseller
November 2020	English	Rio de Janeiro	Brazil	A2 MARINE Alex Franco franco@a2marinesolution.com

MULTIBEAM TRAINING

These courses can be between 3 to 5 days and may include practices on board a Survey boat equipped with a complete Multibeam System. As the name implies, the training focuses on Multibeam systems and only works with the tools we have available to work with this type of system. Here also, registrations are handled through our Agents in each country, so if you want more information do not hesitate to contact them. Please contact them soon as there are only a few places at this training and they tend to fill really fast.

Date	Language	City	Country	Local Reseller
May 26 to 28	English	Rio de Janeiro	Brasil	A2 MARINE Alex Franco franco@a2marinesolution.com
Sept 14 al 18	Spanish	Veracruz	Mexico	SEAPROD – Lic. Víctor Andoni Aguirre Hernández vaah@seaprod.com.mx

DREDGEPACK & VOLUMES TRAINING/DEMO

This will be the first time that we develop this type of course, which will exclusively show our tool for dredges, the DREDGEPACK program, including practices on board a dredge to see the software in action, in addition to that, the course includes theory and practices of navigational channels creation and various types of volume calculations. They will be 3 very intense days with lots of things to see. We will have very limited space on this course, so if you are interested, the earlier you contact our Agent the better.

Date	Language	City	Country	Local Reseller
March 25 to 27	Spanish	Barranquilla	Colombia	DISSMAN Ingenieria Joan Sebastian Pulido Vasquez taller@disssmaningenieria.com

*** DEPENDING ON THE AVAILABILITY OF DREDGE, DATE AND PLACE MAY CHANGE. The latest INFORMATION will always be available through DISSMAN Ingenieria.

HYPACK PAYLOAD DEMO

This is our newest product and we will be conducting at least two demonstrations in Spanish, which will be held in Orlando, Florida. The idea is to do one per semester and the demo will take 2 days each time. The registrations, in this case, will be directly with HYPACK. We will show you how to plan a LiDAR survey and also demonstrate the data collection and processing at a nearby location. There are very limited seats for this demo.

HYDROGRAPHIC CONFERENCES & MEETINGS

In addition to the previous activities, we will be participating in the following events related to Hydrography in the Latin American region.

CHC 2020 Canada: HYPACK will have a stand at the Canadian Hydrographic Conference to be held between February 24 and 27 in Quebec City. Please do not hesitate to visit us and ask us about any of our products. It will be a pleasure to see you there and provide you with information you may need. Remember that this is the most important hydrographic event on our continent during 2020. It will have many presentations and activities and a high participation of the entire hydrographic industry.

XXI MACHC Meeting: This time, the meeting of the Regional Hydrographic Commission of Meso America and the Caribbean Sea will take place in New Orleans, LA. There, as every year, we will participate, with a dozen other members of the industry, in the discussions that all the hydrographic services of the region will have during the span of a week.

First Latin American Hydrography Conference: Although it will not take place until the second half of 2021, I would like to also tell you about an event for which HYPACK will be one of the main sponsors. It is the First Latin American Hydrography Conference, which is planned to be held in Cartagena, Colombia. The event will be organized by the **Latin American Chapter** of the **Hydrographic Society of America (THSOA)** and will feature many activities, keynote presentations, thematic conferences, water demonstrations, exhibitions of the main manufacturers of hydrographic equipment and everything that might interest the wide range of users of Hydrography in Latin America. If you want more information, please contact Rafael Ponce, President of the chapter at rponce@esri.com.

On Site Trainings: If you are interested in a specific training, just for your personnel, using your own equipment and focused on your particular needs, please do not hesitate to contact me at carlos@hypack.com, we can talk about it and I can provide you a quote.
