

HYPACK 2022 Training Event on January 17th-20th is **POSTPONED**

While we were very much looking forward to connecting with you in person, it is unfortunately not going to be possible for January. Given the recent COVID spike and changing travel requirements, we are postponing the event to March 28th-31st, 2022!

SAVE THE DATE: March 28th - 31st, 2022

We are happy to announce that we will be rescheduling the HYPACK 2022 Training Event to March 28th-31st, 2022 at the same location. The event will still be held at the Hyatt Regency in Long Beach, CA. Read more about the event below!

REGISTRATION OPTIONS

You will receive a separate email in the next few days with your registration or key number to proceed with one of the two following options. Once you receive that email, please visit our **Event Website** to choose if you would like to:

Option 1: Transfer your registration to the new date in March

Option 2: Choose to cancel your registration to receive a refund

We are looking forward to seeing you at our 29th annual HYPACK Training Event on our new date of March 28th-31st, 2022 in Long Beach, California! This training will offer instruction on the newest features of HYPACK® 2022 and training in HYPACK®, HYSWEEP®, and DREDGEPACK® software. By attending, you will have the ability to network with attendees and exhibitors. We are also excited to announce that attendees will be able to see HYPACK® in action from live streamed demos!

Training is essential for keeping you and your company up to date with the latest changes in the industry. This three-day event will provide you with the tools needed to do your job efficiently. Knowledgeable employees are the key to being a successful company.

We will be showcasing some of these new features in HYPACK® 2022:

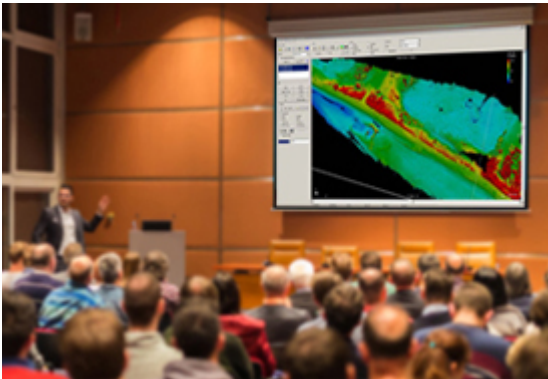

- An all new Survey program
- Integration to Esri's ArcGIS through easy data sharing
- HYPLOT update to easily produce deliverables
- Contour and Sort survey data in the Single Beam Editor
- Water Quality software with the tools required for environmental mapping
- Side scan with full resolution imagery displayed for data collection and mosaic generation
