

# HYPACK Training Options

By Cali DeCastro

We receive lots of inquiries from ambitious dredgers, surveyors, scientists, and IT folk (to name a few) who want to improve their knowledge and skills in HYPACK® and their respective industries. We offer a number of different avenues for receiving training, which I will highlight in this article.

## THE ANNUAL HYPACK TRAINING EVENT

Each year HYPACK hosts a training event to bring people together from across the industry to highlight the advancements in our software and of our industry partners. The event includes training sessions and live demonstrations covering a broad range of topics, as well as exhibitor booths and opportunities to schedule one-on-one sessions with members of the HYPACK team. This year's training event was held in Panama City Beach, Florida.

**HYPACK 2024 will be held January 8-12, 2024 in Savannah, Georgia. We hope to see you there!**

---

## TRAINING COURSES

Training courses on various topics are offered throughout the year in virtual, in-person, and in-the-field formats. Click here to view the [2023 Training Courses Schedule](#). To be notified when training courses are upcoming, you can [sign up for our Newsletter](#).

## CUSTOM TRAINING PACKAGES

Have a group of people who would benefit from HYPACK training? Want training tailored to your mission, focused on your unique equipment setup? We offer custom training packages to suit your specific needs. We can send a trainer to your location and hold the training on-site, or deliver training virtually- whatever works best for you. To inquire about custom training packages, send an email to [training@hypack.com](mailto:training@hypack.com).

## SELF-GUIDED STUDY

There are a number of resources for those looking to learn about different aspects of the software in a self-paced environment. While we do not have a formal self-study platform yet, you can visit the [HYPACK Support YouTube Channel](#) for hours of content on a multitude of topics in both English and Spanish. Additionally, the training material from past HYPACK Training Events can be found here: [Training Event Presentations](#). If you're looking for technical notes on specific utilities, equipment, or workflows, you can find a wealth of information in our [Sounding Better Newsletter](#). Further, you can search articles using the [Documentation Library Search](#) feature.

The HYPACK Support Team is here to help! Let us know how we can support you and your company's training needs. Email [training@hypack.com](mailto:training@hypack.com) for training any inquiries you may have. We look forward to working with you!
