Sounding Better!

News from Europe: May 2017

By Boris Schulze

Hey there again! It's been four months now, since we opened the new European office in Germany. Summer is coming and it is time for an update.

I have been very busy throughout the first months getting the office setup and letting everyone know that we are here. We are also working with our resellers in all the countries to intensify the support for all of our users. So, whatever comments or questions you have, please contact us or your local reseller!

We are working with all the hardware manufacturers, as well, to implement and improve the drivers for their hardware into HYPACK®. I will do some testing with Kongsberg this month to improve those drivers.

We have been to a few of the traditional exhibitions in Europe this spring, including the Ocean Business in Southampton and the IHO Conference in Monaco. The exhibitions are good places to see and talk to a lot of you—resellers as well as users.

We have done some seminars, as well, and more are coming. Here is a list of where you will see us in the near future around the world. This list only shows the seminars outside the US. There are some more over there!

Events/exhibitions in Europe:

- May 30th – June 1st UDT in Bremen, Germany
- June 13th -15th Seaworks in Southampton, UK
- June 20th-21st 31. Hydrographic Day, Flensburg, Germany
- June 20th – 22nd Commercial UAV EXPO, Brussels, Belgium
- September 5th – 8th Offshore Europe, Aberdeen, Scotland
- September 26th – 28th Intergeo, Berlin, Germany
- October TBD Mallorca, Spain
- November 14th – 16th Hydro17, Rotterdam, Netherlands

Seminars around the world:

- May 22nd-24th St. Petersburg, Russia
- June 13th-15th Trinidad & Tobago
- June 27th-29th Rio de Janeiro, Brazil
- July 31st – August 1st Mexico
- August 21st – 25th Goa, India
- September 4th – 6th South Africa
- October 2nd-4th Gdansk, Poland
- October 10th-11th Odessa, Ukraine

Is your country missing? Tell us about it! We are always looking for nice countries to go to and teach you HYPACK!

Boris
