Sounding Better!

HYPACK 2020 Training Notes Available

Spanish and Russian Translations On the Way

By Judy Bragg

Each year the Powerpoint presentations used at our annual HYPACK Training Event are posted on our website. Did you join us in Jacksonville this year and would like to review? Were you unable to attend and wish you did?

Regardless of whether you were there, you can still see some of the information presented “on demand”.

Rob Baird made video recordings of some of the presentations and, after working his “video-editing magic”, has posted them on our [HYPACK Support YouTube site](#). You can read a bit more about that in [his Sounding Better! article](#) this month.

The screenshot shows a YouTube interface. The main video player displays a slide titled "Welcome to HYPACK 2020!" with the subtitle "HYPACK 2020 TRAINING EVENT JACKSONVILLE, FLORIDA JANUARY 6-9, 2020". Below the slide is a bathymetric chart showing depth contours. To the right, a playlist titled "HYPACK 2020" is visible, containing four videos:

- 1. Welcome to HYPACK 2020!/What's New in HYPACK... (31:19)
- 2. HYPACK 2020: Multibeam Data Collection (1:31:32)
- 3. HYPACK 2020: Multibeam Data Processing with MBMax64 (1:23:06)
- 4. HYPACK 2020: Multibeam Patch and Performance Testing (1:11:21)

Additionally, you can download the Powerpoint presentations that we used at HYPACK 2020 event from the [Training Notes](#) page on our website. All of the original English presentations are currently available. Our bilingual staff have been diligently translating to provide them in Spanish and Russian. At this writing, the Spanish presentations are complete and will be posted by the end of February. I'm sure the Russian presentations will follow shortly thereafter.

In the meantime, you can still view the Spanish and Russian language presentations from the past three years. Just type "Training Notes" followed by the year in the site search. The archived page for the year you requested should be at the top of the list on the Contents tab. For your convenience, here are the links to each page:

- [2017 Training Notes](#)
- [2018 Training Notes](#)
- [2019 Training Notes](#)
